MEMORANDUM FOR SEE DISTRIBUTION

SUBJECT: Contracting Information Letter (CIL) 98-14

1. This CIL contains information on the following:

- a. Lessons Learned - Simplified Acquisition Procedures,
- b. GAO Decision, Midmark Corporation,
- c. Annual report of Unauthorized Commitments,
- d. Release of TDA Numbers in CA Studies, and
- e. Purchase Card Joint report.

2. Lessons Learned - Simplified Acquisition Procedures.

a. Use of the Wage Determination On-Line Program reduces CALT in service acquisitions at Fort McCoy. Those installations still using the Blanket Wage Program should take note. The WDOL program avoids the annual time consuming effort to consolidate recurring services requirements, is a real time saver for those unprogrammed requirements, and provides the most current wage decisions. Fort McCoy used materials in CIL 97-13 to train personnel and developed sample Standard Form 98s for buyer use. For additional information, contact Sandra Drecktrah, Chief, Construction Branch, DSN 280-2703.

b. Need a really good checklist for Simplified Acquisitions? Fort McCoy has a good one to benchmark! Call Brenda Heuer, Chief, Service and Supply Branch, at DSN 280-3203.

c. Some installations are centralizing the purchasing of accountable property for the end user rather than using the unit cardholders to make purchases that are within the micropurchase threshold (\$2500 or less). Installations should implement procedures which will allow the cardholder to buy and report these requirements in compliance with DOD, DA, and FORSCOM

AFLG-PR

SUBJECT: Contracting Information Letter (CIL) 98-14

policy. Hand receipt holders should prepare the DD Form 250, Material Inspection and Receiving Report, to acknowledge and report purchases of nonexpendable items to the Property Book Officer (DALO-SMP MSG, 261457Z DEC 96, subject: IMPAC Rules). For additional information, contact Pat Boterweg at DSN 367-5486.

d. Contracting offices generally appear to need additional training in acquisition of Commercial Items. The PUR 201 Course, Intermediate Simplified Acquisition Procedures, provides valuable information in market research, performance based specifications, buying commercial items, and best value source selection. This course is targeted to purchasing agents/SAP contracting officers. Recommend DOCs request quotas for this DAU funded course. For DAU course information, contact Clyde Thomas, DSN 367-6372.

3. GAO Decision, Midmark Corporation.

a. Reference GAO Decision, File No. B-278298, Midmark Corporation (encl 1).

b. Subject GAO decision denies the protest of Midmark Corporation. Midmark protested the issuance of a delivery order placed under the federal Supply Schedule by the Blanchfield Army Community Hospital at Fort Campbell, KY.

c. For additional information, please contact Sandi Bruner at DSN 367-6296.

4. Annual Report of Unauthorized Commitments.

a. New FORSCOM UAC policy, approval levels, and DOC management of UACs implemented in April 1996 had a tremendous positive effect on the FORSCOM UAC Program. The revised UAC policy, as implemented by the Installations, contributed to a significant downward trend in the UACs less than \$25,000. In FY 97, we experienced 120 UACs less than \$25,000 compared to 164 in FY 96 and 152 in FY 95. There is a slight upward trend for UACs greater than \$25,000 and less than \$100,000. We experienced 6 UACs in FY 97 compared to 3 in FY 96 and 2 in FY 95. Only 2 UACs in FY 97, 0 in FY 96, and 1 in FY 95 were greater than \$100,000. Although there is a slight upward trend in UACs greater than

AFLG-PR

SUBJECT: Contracting Information Letter (CIL) 98-14

\$25,000, DOCs should continue to closely monitor UAC activity to ensure we experience progressive improvement in the future.

b. Feedback from the DOCs regarding the revised FORSCOM Form 121-R (required to document UACs greater than \$25,000) indicates it is working well. Most DOCs use the form to document UACs less than \$25,000 as well. The new ratification procedures and changes accomplished the desired goal of reducing administrative workload and expediting vendor payment without lessening the importance of thorough investigation and adjudication of unauthorized commitments.

c. The new policy and procedures provide greater DOC flexibility and responsibility in determining the best approach on how to effectively manage, if not eliminate UACs. Some of the initiatives DOCs use to effect UAC management are as follows: Publish information regarding UACs in newspapers, handbooks, and manuals; publicize the availability of DOC representatives for on-site presentations, provide briefings, and training courses that address how to avoid making UACs; and disseminate the names and phone numbers of DOC POCs that can be contacted for procurement information/guidance to include 24-hour procurement assistance. Other initiatives; aggressive customer education programs, extensive use and training on the use of the IMPAC, briefing incoming Commanders and involving Commanders at all levels to combat UAC problems.

d. You are reminded of the requirement imposed by the FORSCOM Federal Acquisition Regulation Supplement to submit a quarterly report of the UACs below \$25,000 to the Garrison Commander and the concurring officials identified in paragraph 4a(2) of CIL 96-19, Increased Delegations of Authority and Revised Policy on Processing UACs.

e. Contact Julie Grace, DSN 367-5690, for additional information.

5. Release of TDA Numbers in CA Studies. A question has been raised by one of our installations regarding release of the TDA in CA studies. After research within FORSCOM, a final decision has been reached.

AFLG-PR

SUBJECT: Contracting Information Letter (CIL) 98-14

a. Under the Freedom of Information Act (FOIA), we must release requested information, unless it clearly falls within an exemption. The TDA does not fall squarely into any of several exemptions. Therefore, it is our decision that the **TDA can be released.**

b. The TDA reflects requirements (the number of people required to perform the function) and authorized strength (the number of positions authorized/funded). The TDA does not reflect the actual numbers of employees. There are many cases where all authorized positions are not filled.

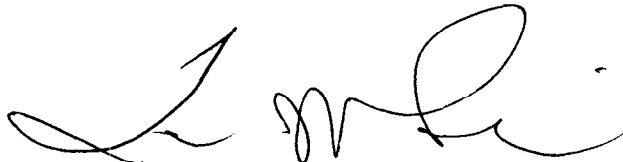

c. Expect to receive an increase in FOIA requests for TDA and other staffing information as a result of CA studies underway throughout the Army and DOD. In all cases, the proper FOIA coordination should be followed in determining the release of information. This guidance should be reiterated in all customer training and as part of the Directorate's of Contracting (DOCs) involvement with the Installation CA steering committee.

d. The above represents the views of the PARC Office, FORSCOM DCSPIM and the Staff Judge Advocate. For additional information, please contact Gail Burrell at DSN 367-6787 or email [burrellg@forscom.army.mil](mailto:burrellg@forscom.army.mil).

6. Purchase Card Joint Report.

a. Reference CIL 97-43, paragraph 3.

b. The web site for subject report has changed. The new site is <http://www.purchasecard.dfas.mil/impteam.pdf>. For additional information, please contact Pat Boterweg at DSN 367-5486.

### DIGEST

Agency properly placed an order with Federal Supply Schedule vendor offering the lowest price for equipment meeting the agency's needs.

### DECISION

Midmark Corporation protests the issuance of delivery order No. DAKF23-97-F-0524 to Enochs Manufacturing, Inc. by the Department of the Army for medical examination tables for the Blanchfield Army Community Hospital (BACH) at Fort Campbell, Kentucky. The delivery order was placed under Enochs's Federal Supply Schedule (FSS) contract.

We deny the protest.

After receiving a purchase request from BACH for 119 medical examination tables, the contracting officer decided to purchase the requirement under the FSS program. The FSS program, directed and managed by the General Services Administration (GSA), provides federal agencies with a simplified process for obtaining commonly used commercial supplies and services at prices associated with volume buying. Federal Acquisition Regulation (FAR) § 8.401(a). When placing an order under an FSS, an agency is not required to seek further competition, synopses the solicitation or award, or determine fair and reasonable pricing, since the planning, solicitation, and award phases of the FSS satisfy these FAR requirements. FAR § 8.404(a); Design Contempo, Inc., B-270483, Mar. 12, 1996, 96-1 CPD ¶ 146 at 2.

The BACH purchase request was for an examination table with a pelvic tilt and listed the Midmark Model No. 405 as a compliant model. The contract specialist checked the FSS catalog to assess whether there were other examination tables that

ENCL

satisfied the hospital's needs, and, after reviewing the schedule information, determined that two listed tables met the government's needs. The tables were the Enochs Power 4000, listed at \$3,483.78 per unit, and the Midmark Model No. 405, listed at \$3,385.85 per unit. Because of the substantial quantity to be ordered, in accordance with FAR § 8.404(b)(3), the contracting officer contacted both vendors about the possibility of a price reduction.

Enochs submitted quotes for its Power 4000 of \$3,100.56 per unit for a total of \$368,966.64 with a 4-year parts and labor warranty, and \$2,900 per unit for a total of \$345,100, for the same model with a 1-year parts and labor warranty and an additional 3-year parts-only warranty.

Midmark submitted a quote for its Model No. 405 of \$3,419.02 per unit for a total of \$406,863.38 with a 1-year parts and labor warranty (the quote was slightly higher than the FSS price due to the addition of a bracket). Midmark also submitted quotes for the Ritter Model 105 at \$3,240.14 per unit for a total of \$385,576.66 and the Ritter Model 107 at \$2,440.16 per unit for a total of \$290,379.04—both with the same 1-year warranties. In addition, Midmark offered a \$250 trade-in credit for each Midmark or Ritter power examination table and \$50 for each Midmark or Ritter non-power box style examination table (for up to 119 trade-ins).<sup>1</sup>

BACH technical representatives reviewed the quotes and evaluated the tables to determine if they met BACH requirements. After the evaluation, the agency determined that the Enochs 4000 table (with a 1-year parts and labor warranty and additional 3-year parts-only warranty) best met the government's needs at the lowest price. The technical evaluators considered Midmark's quote for the Ritter 105 and 107 examination tables, but determined that these tables did not meet the agency's needs. The Ritter models were considered unacceptable because no extended warranties were offered and because the models lacked required safety features. The most significant feature which these models did not provide was an operator-resettable, externally mounted circuit breaker, which permits the operator to re-set the breaker without calling for additional maintenance support, and which was considered an essential patient safety requirement. A delivery order was issued to Enochs on September 18. Delivery of the tables has been suspended pending resolution of the protest.

In its protest, Midmark asserted that its Model 405 was the specified brand name and had certain unique features not found in the Enochs 4000. Midmark also argued that if award was based on price, then its Ritter Model 107 met the specifications and was cheaper than the Enochs 4000. The agency pointed out in its protest report that this acquisition was not conducted as a brand name or equal

---

<sup>1</sup>The agency reports that the trade-in offer was not considered because BACH did not desire to trade in any examination tables.

procurement and that the unique features of the Model 405 referenced by Midmark were neither requested nor required by the user activity. In its comments on the agency report, Midmark abandoned its argument concerning its Model 405 and essentially asserted that it should have been issued the delivery order because its Ritter 107 meets the specifications at the lowest price. Midmark maintains that an external circuit breaker was not specified by the agency, but if one was necessary, Midmark could provide it at no extra cost, and that Midmark could also provide an extended warranty.

When ordering from the FSS, the procuring agency should place orders with the schedule contractor whose product represents the best value and meets the agency's needs at the lowest overall cost. FAR § 8.404(b)(2) (June 1997). The determination of the agency's needs and which product on the FSS meets those needs is properly the agency's responsibility, and we will only examine the agency's assessment of technical acceptability to ensure that it has a reasonable basis. Design Contempo, Inc., supra at 3.

Here, the agency evaluated the available technical information and concluded that the Midmark 405 and the Enochs 4000 met its requirements. When it contacted the appropriate vendors about the possibility of a price reduction, Enochs reduced the price for its warranted product. Midmark quoted a higher price for its Model 405 and, while Midmark also quoted its Ritter 107 model at the lowest price, the protester did not offer an extended warranty with this model, and the table lacked safety features which the agency considered essential to meet its needs. Consequently, the agency issued the delivery order to Enochs because it offered the table that best met agency requirements at the lowest price.

The agency explains that, while it does have some older Ritter 107 tables in use, because of the types of procedures they anticipate performing, this model lacks the safety features and the extended warranty necessary to meet the agency's current needs. In this regard, FAR § 8.404(b)(2)(ii)(A), (D) (June 1997) provided that the ordering activity may take into consideration warranty conditions and special features of an item not provided by comparable items, which are required for effective program performance. Here, based on these considerations, the agency reasonably determined that the Enochs 4000 table met agency requirements and that the Ritter 107 table did not. Midmark's assertion in its protest submissions that it could provide the Ritter 107 with an external circuit breaker at no extra cost and

offer the same warranty as did Enochs, at an unspecified price, does not establish that this model will meet the requirements of the agency at the lowest price.<sup>2</sup> Accordingly, we have no basis to question the agency's decision to issue the delivery order to Enochs.

The protest is denied.

Comptroller General  
of the United States

---

<sup>2</sup>To the extent that the protester argues that the agency did not specifically advise it of the requirement for an external circuit breaker or extended warranty, there is no requirement under the regulations governing the use of the FSS that firms holding FSS contracts be provided with an exact statement of agency needs or that agencies negotiate special terms or conditions with FSS contractors for individual purchases. FAR Subpart 8.4. Such a requirement would be inconsistent with the catalog-type approach of the FSS program.
